

## STREET ART TREES LOWER HUTT CITY CENTRE DECEMBER 2021

A street art inspired Christmas tree trail on the footpath in 2021 will add another 10 trees to the street, extending north on High Street and further into the Southend. Christmas on High offers people to meander at their own pace and time enjoying the work of local artists. There are 10-12 two dimensional wooden trees 1.8m tall, laser cut from marine ply with a base available this year. The trees will be offered to local mural and street artists to create unique street art trees. There is a renewed vision for celebrating Christmas in the CBD. It is all about Christmas trees, inside shop windows, in vacant shops fronts and on the street. Street Art Trees started in 2020 with 10 trees installed on High Street, as a new seasonal activity the first year to added interest and vibrancy during last year’s Christmas season in the CBD.

These trees will be installed throughout the Central City for all to enjoy for the month of December.

We are looking locally for interested street art or mural artists that can demonstrate an understanding of street art and have the ability to complete a tree by 28 November, 2021.
