

RiverLink Travel Survey

Tell us how you travel to work and help us plan for changes to our transport network.

We want Te Awa Kairangi ki Tai Lower Hutt to be a place where everyone thrives and Hutt City Council is investing in major infrastructure projects such as RiverLink to enable this.

RiverLink will bring transport improvements, upgraded flood protection and urban development to make the city more resilient, more connected and more vibrant.

RiverLink developments will cause changes to the transport network in the central city, in particular the essential flood protection work will incur a reduction of space in the Riverbank carpark, reducing the number of parking spaces available.

We are developing a transition plan to manage the changes that are necessary during and after the RiverLink developments and provide solutions for people who work in the CBD for work and other users of our transport network.

We want to hear about your travel patterns and needs so we can focus on the solutions that are important to you.

Visit hutt.city/commutersurvey or scan the **QR code** below to take the survey.

All completed surveys will go into our weekly draw for a \$50 voucher to use at one of our great local businesses. And once a month we will draw one lucky workplace that will win a morning tea shout for their staff.

Survey closes 31 August 2022
